WHAT IS THE “STEM Initiative”?

The “STEM Initiative” supports and promotes activities encouraging students’ interest and pursuit in Science, Technology, Engineering and Mathematics.

Why is the STEM Initiative Important?

STEM education creates critical thinkers, increases science literacy, and enables the next generation of innovators. Innovation leads to new products and processes that sustain our economy. This innovation and science literacy depends on a solid knowledge base in the STEM areas. It is clear that most jobs of the future will require a basic understanding of math and science—10-year employment projections by the U.S. Department of Labor show that of the 20 fastest growing occupations projected, 15 of them require significant mathematics or science preparation.

- U.S. student achievement in mathematics and science is lagging behind students in much of Asia and Europe. International test scores tell us that in science U.S. eighth-graders were outperformed by eighth-grade students in Singapore, Chinese Taipei, Republic of Korea, Hong Kong SAR, Estonia, Japan, Hungary, and Netherlands.
- In math, U.S. eighth-graders were outperformed by their peers in 14 countries: Singapore, Republic of Korea, Hong Kong SAR, Chinese Taipei, Japan, Belgium, Netherlands, Estonia, Hungary, Malaysia, Latvia, Russian Federation, Slovak Republic, and Australia.

Increased commitment from businesses and other stakeholders that support STEM education is critical, now more than ever. STEM education creates the pipeline of future innovators that will move this country forward. Making STEM education a priority is important, for our nation’s short and long-term future.

MISCELLANEOUS STEM OFFERINGS

America’s Teachers at I/ITSEC

To further education in Science, Technology, Engineering and Mathematics (STEM) teachers from across the U.S. are invited to take part in I/ITSEC. The goal is to instigate interest in teachers who can then pass on their new appreciation for M&S to their students. In 2019, I/ITSEC hosted teachers from across the U.S., with your sponsorship help we hope to host even more in 2021!

Sponsorship Includes: Recognition on America’s Teachers signage located throughout OCCC and at America’s Teachers booth located within I/ITSEC Exhibit Hall, sponsor recognition in Program Guide and recognition when comments/articles speak of the America’s Teachers at I/ITSEC.

INVESTMENT: \$3,000 (PER TEACHER, MINIMUM OF 5 AVAILABLE)

Student Tours

In 2019, over 600 students from across Central Florida participated in the unique learning environment of visits to the I/ITSEC exhibits. Students take these tours seriously as they learn about the basic building blocks required to deliver high fidelity modeling and simulation products across a broad range of training environments. What better way to get your name out to the masses than on over 600 moving billboards of your logo.

Sponsorship Includes: Sponsor name on Student name badges, logo recognition on signage located in the OCCC, sponsor recognition in Program Guide, recognition when comments/articles speak of the Student Tours and logoed bags that each student will carry throughout their tours of the exhibit. In addition, the logoed bags will be distributed at the Future Leaders Pavilion located within the STEM Pavilion.

INVESTMENT: \$3,000 (4 AVAILABLE)

FUTURE LEADERS PAVILION

The charter of the Future Leaders Pavilion at I/ITSEC is to offer high school students the opportunity to experience the many advanced applications of the sciences they study: physics, mathematics, computer science, modeling and simulation in addition to presenting projects of their own. FLP participants take the knowledge gained at I/ITSEC back to their schools and incorporate it into their lives as they move forward into college.

As a result of the many hours of mentoring from the I/ITSEC community, many of these students eventually return to work for these very companies who have championed their cause during their school years. They begin their professional careers as a prepared, experienced and committed workforce. I/ITSEC and its member companies show them what they can become and how they can forge a career in the M&S marketplace.

Take a look at the great opportunities and Sponsor the Future of the M&S Industry!
